

PROTECTING OUR ENVIRONMENT TOGETHER

The Permanent Fund Dividend Division encourages all applicants to ***file online and use Direct Deposit*** each year in an effort to reduce the amount of paper used to process PFD applications.

Less paper means more trees!

Help us save and protect our environment for future generations by filing online and selecting Direct Deposit. Electronically signing your application for those who received a dividend or filed an application in the prior year saves most applicants from having to submit any information by paper. Ask us about electronic signature through myAlaska today! Filing online is easier, eco friendly and provides an immediate receipt for applications. Working together, we can reduce our carbon foot print and reduce the amount of waste we produce.

In 2009 170,000 paper PFD applications were received by the Division. The environmental impact of producing and processing the 170,000 applications was:

- 🌳 4,761 pounds of paper generated.
- 🌳 57 trees cut down.
- 🌳 84,917 pounds of greenhouse gases produced.

The PFD Division will continue to work on ways to reduce the amount of paper required to process, review, and finalize applications. Look for opportunities, in the near future, to make changes to applications online that are already in the PFD system. Let's work together to make a difference!
